

Bioclear™ Microbiome Detox Program

CONVENIENTLY PACKAGED 30-DAY DETOX PROGRAM
SUPPORTS DETOX BY REESTABLISHING MICROBIAL BALANCE*

When it comes to health, microbes matter most. That includes detoxification – something we all need. The Bioclear™ Microbiome Detox Program focuses on microbial health, reducing the load on the liver. Clearing the way for efficient detox, stabilizing the microorganisms in the gut. Detoxification done right.

How does it work? Synergy. Activity that is greater than the sum of the parts. Three laboratory-tested, clinically researched formulas work together, supporting the right balance of flourishing microorganisms in the gut microbiome.

REMOVE

Remove. Clear away obstacles. Entrenched biofilms and unwanted organisms can create an obstacle that requires outside assistance. The vital first step is to clear away irritants, unwanted microbes, and biofilms – allowing the body's innate restorative ability to go to work.

BIND

Bind. Intercept and eliminate toxins. How can you make toxin removal safe and even comfortable? Pull out debris. Intercept and eliminate unwanted toxins and microbial byproducts. Detoxification done right.

RESTORE

Restore. Bring balance and healing. Undesirable microbes create imbalances, even disorder. The effort to restore harmony requires ongoing renewal – and that's where our botanicals and nutrients shine. Offering needed provisions, they allow the body to establish balance. Plants unite with the body to revive and strengthen – cultivating microbial diversity, healthy digestion, nutrient absorption, and sustained well-being.

Benefits

- Supports healthy detoxification and full-body cleansing*
- Supports microbial balance in the GI tract*
- Selectively enhances beneficial organisms*
- Supports a more comfortable cleansing experience*
- Supports vitality and mental clarity*
- May reduce bloating and gas*

Features

- Professional-grade ingredients
- Laboratory tested and clinically researched
- Broad-spectrum products work as a synergistic trio
- Assists in detoxification of environmentally and endogenously produced metabolites*
- Convenient 30-day supply of all three products
- Cost effective at 15% savings over individually priced products

Ingredient Mechanisms of Action

Scientific literature shows that the individual ingredients in Biocidin®, G.I. Detox™+, and Proflora™ 4R have multiple activities. Below are highlights that may account for the outcomes seen in a clinical setting.

Supports Microbial Balance – The botanical extracts and essential oils in Biocidin® and G.I. Detox™+, along with the spore-forming microorganisms and botanicals in Proflora™ 4R work with powerful synergy to clear unwanted microorganisms, while selectively enhancing beneficial organisms.

Binds and Eliminates – The nutrients in G.I. Detox™+ provide broad-spectrum binding capabilities. Once bound, irritants and toxins are neutralized and moved out of the body.

Immunomodulatory/Supports Healthy Inflammatory Response – Almost all of the botanicals in these three formulas play a role in supporting healthy immune activity against unwanted organisms and assisting normalized inflammation.

Biofilm Disruptor – The botanicals in Biocidin® work in five different ways to disrupt biofilms. They inhibit quorum sensing, initial attachment phase, and swarming motility. They also disrupt the microbial lipid bi-layer and inhibit efflux pump activity.

For a more complete description of the mechanisms of action of each ingredient in these three products, see their individual product sheets.
